Roles and Responsibilities:

- **Project Manager:**
  - Overall vision, timeline, and milestone tracking.
  - Makes final decisions and coordinates all project phases.

- **Business Analyst:**
  - Defines project objectives and requirements.
  - Identifies target audience, stakeholders, and constraints.

- **Software Developer/Engineer:**
  - Develops the core functionalities such as the translation API integration and cross-platform UI.
  - Handles performance optimization and code quality.

- **UX/UI Designer:**
  - Designs the user interface and user experience, including layout, interaction flows, and accessibility considerations.
  - Develops wireframes, prototypes, and final mockups.

- **Quality Assurance (QA) Specialist:**
  - Establishes testing strategies to ensure reliability and smooth real-time performance.
  - Manages debugging, performance testing, and user feedback cycles.
